

Setting up the Tender Summary Report in System Five

*** SQL must be enabled in System Five for this to work**

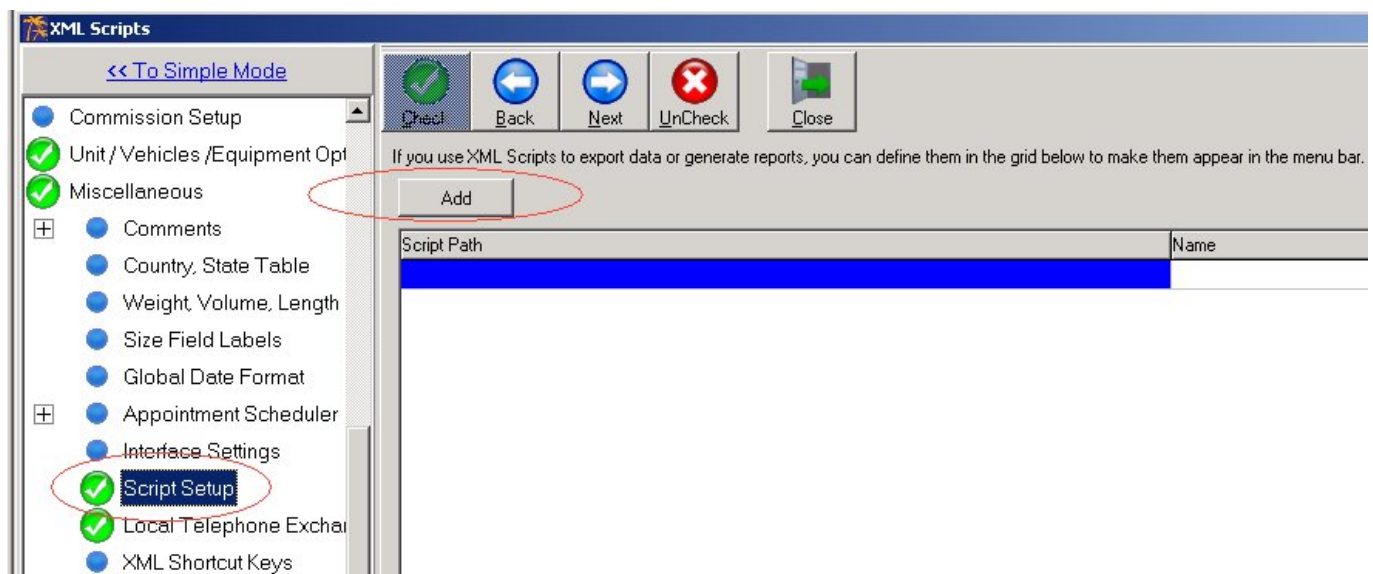

*** The files must be extracted to the \tendersummary folder off the root of your C: Drive for this report to work**

- First, download the tender Summary zip file from the ftp site

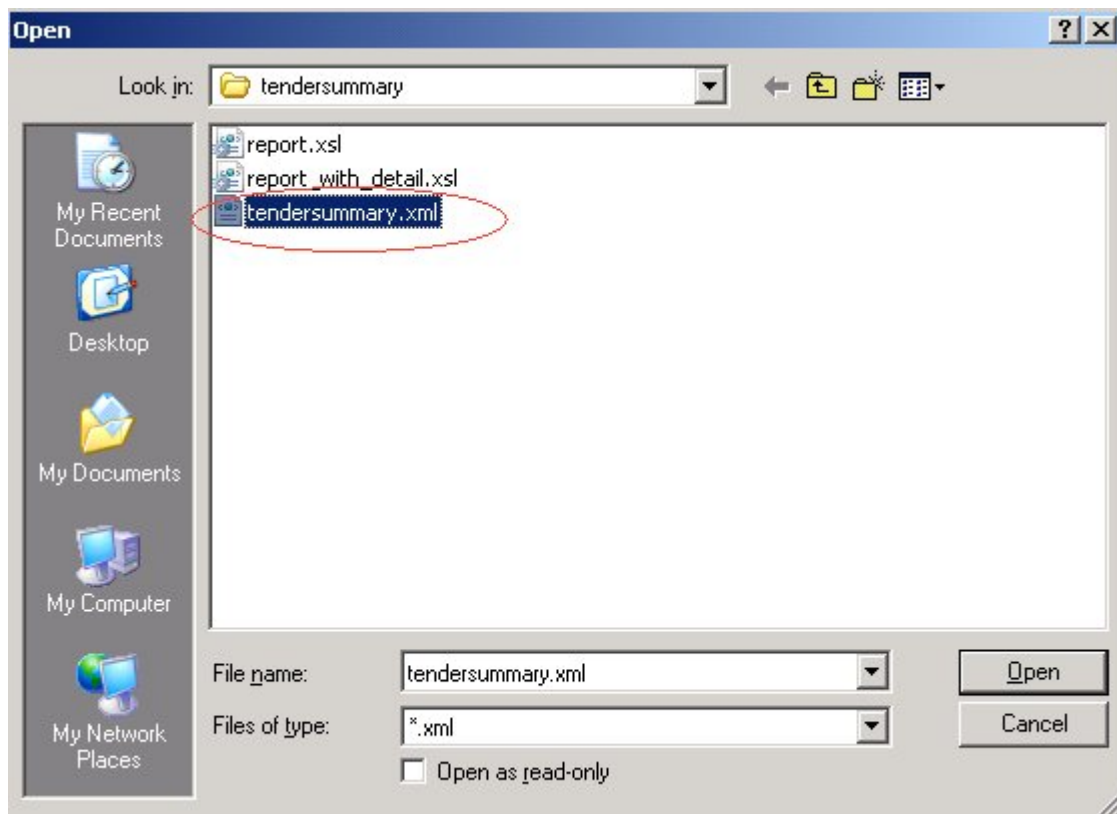

ftp://ftp.windward-ca.com/pub/special/tender_summary_report.zip

- Extract this file into a directory on the root of your C: drive called C:\tendersummary

- Once the files are extracted, go into the Setup Wizard in System Five and under Miscellaneous, go into script setup. Click the ADD button and browse to the tendersummary.xml file under c:\tendersummary.

- To add the tender detail report, go into the Setup Wizard in System Five and under Miscellaneous, go into script setup. Click the ADD button and browse to the tenderdetail.xml file under c:\tendersummary.

- Once added, you will now see in the navigator, a new option choice called SCRIPTS. Click on the tendersummary.xml link to run the tender summary based on the date range specified by the user or choose the tenderdetail.xml to see the report with daily detail.
