

How to setup Autosynch?

There are two ways:

1. Once logged in to System 5, go to Utilities> Synchronize with File server.

```
-- Make sure you select the path to the server bin
```

2. Check your local system 5 bin for file named 'SYNCSRV.INI'

```
-- Right click on the file and 'Edit'
```

W:\Windward\System5\bin\ ←— this is for the directory of your server bin

ENABLE=Y ←— means we enabled synchronization

ENABLEWIN=N ←— change N to Y if you want system 5 to synch during windows StartUp

SHORTCUTS=N

AUTOSYNC=Y ←— means Autosynch is enabled. (Should go hand in hand with ENABLE=Y)

RESTART=C:\Windward\System5\bin\systemfive.exe ←— Local bin directory
