

# Updating a Standalone Dataset

1. Sync Standalones before the Main Dataset rebuild
2. Install new version of System Five software to the standalone computer after Main Dataset is rebuilt.
3. Relicense the Standalone to the current license
4. Log into standalone and rebuild the Standalone Dataset
5. Log into standalone again. Access the Windward System Registry and go to the Standalone Key
6. Set MAINDATASET key = N (It will be set to Y after the license code reset)
7. Log back into standalone to verify it is in the standalone mode.
