

# Using Terminal Works to Print to a Slip Printer from Windows XP

## Problem Description

<http://www.terminalworks.com/>

Terminal Works will not print to a local slip printer from a Terminal Services Session without doing the following.

## Detailed Problem Solution

Obtain the following file from a Windows Vista or Windows 7 PC `c:\windows\system32\TsWpfWrp.exe`

This file is the “Windows Presentation Foundation Terminal Server Print Wrapper”

Rename this file in the Windows XP computer. It will also exist in the `c:\Windows\System32` folder there, but it will be an older version of the file.

**WARNING** DO NOT DELETE IT. If this fix does not work, or causes another issue with your version of Windows XP you may need to put this older version back.

Once you have renamed the file, copy the new one you obtained from the Vista/ Windows 7 PC, and place it in the `c:\Windows\System32` folder.

Now, once you have terminal works installed on the XP machine, you should be able to print to the receipt printer
